

In the specification:

Pg. 9, second paragraph:

-- The device 160 is shown taped by adhesive strips 210, 212, 214, and 216 to the forehead 301 of the infant 300. The portion or flap 36 of the nose piece 10 is shown taped by adhesive strip 218 above the upper lip 303 of the infant 300. The strip of adhesive 218 is long enough to secure the nose piece 4 10 in position in front of the nasal openings 302a and 302b, extending beyond extension or portion 36 of the nose piece 10 onto the skin of the upper lip 303. --
